**Experience**(Note: This resume does not cover all of my relevant professional experiences.)

### IOS developer

**Skills (jobs/  
education)**

**01/2023 - Current**

- I'm working on a project that aims to help people looking for jobs in the future in a more humane and fair way, that's all I'm allowed to talk about.
- In addition to developing the front part of this application, I work integrated with the mobile web application -> Swift/ SwiftUI UIKit snacks.

### DEV Front end/mobile

**SIDIA**

*Manaus, AM, Brazil*

**09/2022 - 01/2023**

- I worked in one of the biggest institutes in Latin America, with 3, big projects, using React and Vitest, to designing the front-end with unitTest -> C#, C, React, Kotlin, Tailwind, jest.
- I learned , Kotlin (Android), to develop the application of a dashboard for Wear-OS, such as projects, I help to improve at 10% the speed built code, using TDD and some patterns .
- Helped with the development using c++ of an artificial intelligence that detects fire, and helped with the organization and update of the image bank for this AI, and created filters in python to increase the detection accuracy,
- Software implementation, engineering, testing, and configuring metrics, alarms, monitors, and dashboards.
- Continuous Integration/Deployment Pipeline Integration, pull requests, code reviews, load/stress testing, unit/integration/e2e testing

### Fullstack.

**IZagro**

*Sao Paulo, SP, Brazil*

**09/2019 - 11/2020**

- I started the company's sales website with another team of freelancers, making it responsive and visually appealing, using -> Java, React, AngularJS, Next.js, UI UX, TDD, JIRA.
- Shortly afterwards, I was reassigned to work on the project's dashboard and assist with its development, and, i was trained by Beck's team to work with the database, validation in a matter of weeks."
- Automated and optimized business logic for the core marketing experiments, including A/B, Auto-Targeting, and Multivariate Testing.
- Completely automated the marketing and dashboard platforms' user-experience testing process by using Nunit and Selenium.

### Front end Engineer.

**TELUS International AI  
Data Solutions**

*Vancouver, Canadá*

**12/2014 - 03/2017**

- Providing audio and technology consulting services, I worked on building the front-end of some web applications, and starting some mobiles.  
driving monthly revenue of \$half million using **C# .MSSQL**, node, react, redux, and jQuery.
- Help to build a better commerce platform's cancel, return, and exchange systems (PC/Mobile).
- Helped and learned a lot with the team related to agile methodology and good development practices.

### Freelance Fullstack.

**C6 Bank**

*Sao Paulo, SP, Brazil*

**03/2017 - 04/2019**

- As a Full Stack Developer at C6 , my responsibilities included developing and maintaining the site with our lead conversion and customer acquisition website, which also allows the registration of sensitive data.
- I was responsible for developing and maintaining both the front-end and back-end components of the company's software applications, which had a 4.73% growth in customer conversation for the company, and had more than 70,000 positive impressions, from customers who liked the new design.
- This included designing and implementing user interfaces, building and integrating APIs, developing database schemas and queries, and testing and debugging code. -> React, Node, jQuery, Next.js, UI, UX, TDD, JIRA.
- I helped to continue the development of the self-service bot.

### Freelance Front end developer

**TVLAR**

*Manaus, AM, Brazil*

**02/2014 - 04/201**

- Our focus was to create a new sales website with customer registration for the company's new branches(java,react,more)
